

2/5/77

Dear Larry,

I've not heard from the lawyer and I've not received the Kup column.

I realize both of you may have been busy. This is in case they were sent.

Prentice-Hall has begun the puffing of the Lane-Gregory book on the King assassination, Code Name 'Zorro.'

There is mention in the 1/19 Publishers Weekly.

I'd like very much to get every word of puffery, every boast, claim or word of any kind. I do not know if these are routed to you.

Probably an inquiry to the flacks at Prentice-Hall, Englewood Cliffs, N.J. is all it would take for a paper, especially where Gregory comes from.

I do wish that when you people up there ^{are} ~~have~~ not dedicating yourselves to spectacular self-destruction you can manage your weather better. You have a way of sending it down here and it is not good.

We've been snowed in a fair percentage of recent weeks, except for my walking out to the mailbox and back twice a day. I did get to Washington last week with a friend who picked me up on the road.

We can get in and out by car now if you people can manage not to disturb Mother Nature for a while.

Thanks and best regards,
